

Community Power Cornwall

Community-owned renewable energy generation

An ethical investment opportunity

Invitation to become a member and invest in Community Power Cornwall Limited.

Community Power Cornwall Limited

Registered as an Industrial and Provident Society with the Financial Conduct Authority in England and Wales under the Industrial and Provident Societies Act (and any successor act) on 3rd July 2008 (no. 30512 R).

Share Issue Offer: of between 50 and 100,000 shares per individual member at £1 per Share.

Offer opens: 5th June 2014 at 9am
Offer closes: 22nd December 2014 at 5pm

Introduction

Community Power Cornwall offers an opportunity to invest in a renewable energy co-operative bringing clear benefits and risks. This document has been prepared in good faith by the directors of the society with the interests of all members and participating communities in mind. It explains how the issue of shares has been prepared and lays out the principal aims of the society and how it plans to meet its environmental, social and financial objectives.

This document is an invitation to take part in shaping your sustainable energy future.

Why is Community Power Cornwall seeking your investment?

This share offer has been issued to raise investment for identified renewable energy projects that help realise the aims of the society. Community Power Cornwall has a portfolio of projects, both operational and in development.

The society is also about bringing together, enhancing and sharing the skills of its members for the future prosperous development of community owned renewable energy and low carbon schemes.

This work is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License.

About this co-operative

Community Power Cornwall is an independent co-operative with a good track record. The society works to enable community ownership of renewable energy assets, to generate capital to be reinvested locally in low carbon activities and to nurture the spread of community owned renewable energy generation. The society exists to serve the community and hopes to contribute to the wider good by responsibly meeting our environmental, social and financial goals.

Community Power Cornwall launched Cornwall's first public share offer for investment in renewable energy in 2011 and currently has two operational sites.

Our vision

Our vision is a near future powered by thriving, democratically controlled, community-owned, renewable energy at a range of scales, using a range of technologies. We see mutual support as a key element of this vision, both practically, and financially. It is this mutual support that will enhance the resilience of communities and reduce grant dependency.

We want to ensure that everyone has the ability to participate in this exciting new future

Your opportunity – reasons to invest

The technology has evolved, the policy and legislation is in place and the financial incentives now exist for the rapid expansion of renewable energy systems in the UK. Widespread awareness and experience of the immediate threats posed by climate change, energy supply and energy security is also at an all-time high. These threats and opportunities have combined to create an attractive environment for investment in renewable energy technologies and we want to ensure that everyone has the ability to participate in this exciting new future.

Community Power Cornwall provides an economic model through which local people and interested communities can own and benefit from the development of these renewable energy initiatives.

Community ownership offers the opportunity to create a diverse, sustainable and secure energy supply infrastructure, under control of the community and with profits returned to the local economy. We are offering the chance to take advantage of current and future opportunities whilst retaining more of the environmental, social and financial benefits within Cornwall.

Community Power Cornwall

By purchasing shares in Community Power Cornwall you will:

- ⚙️ Contribute directly to efforts to reduce local carbon emissions and negative impacts of human activity on the environment.
- ⚙️ Ensure that the community participates in the ownership, direction and development of renewable energy resources.
- ⚙️ Gain an equal vote in how the society is managed, enhanced and developed.
- ⚙️ Be eligible for a variable interest payment based on the performance of Community Power Cornwall.
- ⚙️ Enable the continuation of local low carbon funds.
- ⚙️ Develop a local energy supply, securing the benefits of decentralised energy production and the efficiencies of generation and distribution this brings.
- ⚙️ Contribute to the provision of clean, green, sustainable renewable energy supply in Cornwall, building long term prosperity and economic security.
- ⚙️ Increase the skills and capacity within Cornish communities to cope with and take advantage of future sustainable energy supply markets.
- ⚙️ Support the development of a replicable working model to be rolled out across the UK and beyond.
- ⚙️ Support the development of a sustainable, peer reviewed, community development finance institution, 'The Low Carbon Society'.
- ⚙️ Support the emergence of a local energy market.

Shareholding

Shares will be issued at the value of £1. The value of the shares could decrease but is not likely to exceed £1. The minimum shareholding for "full" adult members is £50 and the maximum permitted by law is £100,000 except for other Industrial and Provident Societies and nominee investors. Larger sums can be accepted as loans, grants or donations.

These shares are non-transferable, withdrawable, at risk, ordinary shares. The notice period for withdrawal is 13 weeks. However to be EIS eligible shareholding must be for at least 3 years from the time the qualifying operations begin. The directors have the right to change the notice period or suspend withdrawals for a fixed time or until they decide otherwise. The directors may also suspend withdrawals if 10% of share capital is withdrawn in any one year. These shares will usually be redeemed at the issue value of £1, however if the directors are instructed that the aggregate of the society's liabilities and issued share capital exceeds its assets then the value of the shares may be adjusted accordingly and hence the redeemable value.

We are also offering special purpose microgeneration shares that are the same as standard shares except they will pay a lower financial return and will support the viability of smaller installations.

We expect our members to benefit:

- ⚙️ Through the receipt of an expected interest payable on their investment.
- ⚙️ By significantly reducing their contributions to climate change.
- ⚙️ By making an environmental, social and financial contribution to your community.

Your investment - and your expected returns

Our offer should be seen as an ethical investment opportunity attracting a blend of environmental, social and financial returns.

Expected financial return

The primary purpose of Community Power Cornwall is to serve the community by enabling the successful development of renewable energy resources. As an Industrial and Provident Society, Community Power Cornwall may use its profits to promote its objectives and may pay interest to members on their shareholdings sufficient to attract and retain capital in furtherance of our social purpose.

To date we have exceeded the expected share interest payments stated in our last share offer document and have in fact doubled it.

We expected to pay 1% pa related to year ending Oct 2012 and actually paid out 2%. We expected to pay 2% pa related to year ending Oct 2013 and actually paid out 4%.

Standard shares	
Year ending	Expected return (excluding EIS)
31 st Oct 2014	5% pa
31 st Oct 2015	6% pa

On our standard shares we expect to pay interest at 5% pa related to year ending 31st October 2014, building to 6% pa related to year ending 31st October 2015 onwards. This represents an Internal Rate of Return (IRR) of 5.87% over 10 years and 5.78% over 5 years. The expected IRR for Enterprise Investment Scheme eligible investments is 10.34% over 10 years and 13.33% over 5 years.

Microgeneration shares	
Year ending	Expected return (excluding EIS)
31 st Oct 2014	3% pa
31 st Oct 2015	3% pa

On our microgeneration shares we expect to pay interest at 3% pa related to year ending 31st October 2014 onwards. This represents an Internal Rate of Return (IRR) of 3% over 10 years and 3% over 5 years. The expected IRR for Enterprise Investment Scheme eligible investments is 6.99% over 10 years and 10.22% over 5 years.

In order to keep administration costs to a minimum, interest payments of less than £5 will be held by Community Power Cornwall and can be paid to members when the accrued value exceeds £5.

Tax incentives

Community Power Cornwall has sought to enable shareholders to gain tax relief under the Enterprise Investment Scheme (EIS) and prior to our 2011 share offer secured advance assurances from H M Revenue and Customs that a 3 year investment in shares would comply with the EIS. Shares issued in 2011, 2012 and 2014 have attracted EIS relief. However, we do not guarantee EIS eligibility of each investor. Qualifying investments attract tax incentives including a 30% income tax reducer in the first year, equivalent to 10% per year over 3 years. We recommend investors seek independent financial advice. For further information on EIS see www.hmrc.gov.uk/eis

Community Power Cornwall

Environmental return

Since 2011 Community Power Cornwall has been producing measureable environmental returns. Each of the 1,044,273 kWh we produced by 26/05/2014 has enabled 0.480kg (Energy Saving Trust 2014) less CO₂ to be emitted from burning fossil fuels. **Therefore we have saved 501,251 kg of CO₂ so far.**

The decentralised method of energy production holds further environmental gains reducing the large amount of electricity lost through production and distribution in the centralised, fossil fuel generated, electricity generation model.

Community Power Cornwall's commitment to community engagement, skills transfer, and behavioural change also seeks to produce noticeable changes in host community's patterns of energy use and overall levels of consumption and emissions. The energy hierarchy is critical and we aim to embed an operational group of well advised residents in host communities with the knowledge and finance available to target further energy reduction schemes and independent renewable energy generating capacity.

Social return

The development of renewable sources of energy is urgently required to address the dual challenges of climate change and energy security threatening the wellbeing of communities across the globe. Community Power Cornwall will ensure participation in the democratic control of renewable energy resources by the local community. **Community Power Cornwall has also maximised the sustainable financial and employment value from the construction, operation and maintenance of these developments through the use of local suppliers and contractors wherever possible.**

- Included within the current share offer
- In development with Community Power Cornwall for other community energy co-operatives

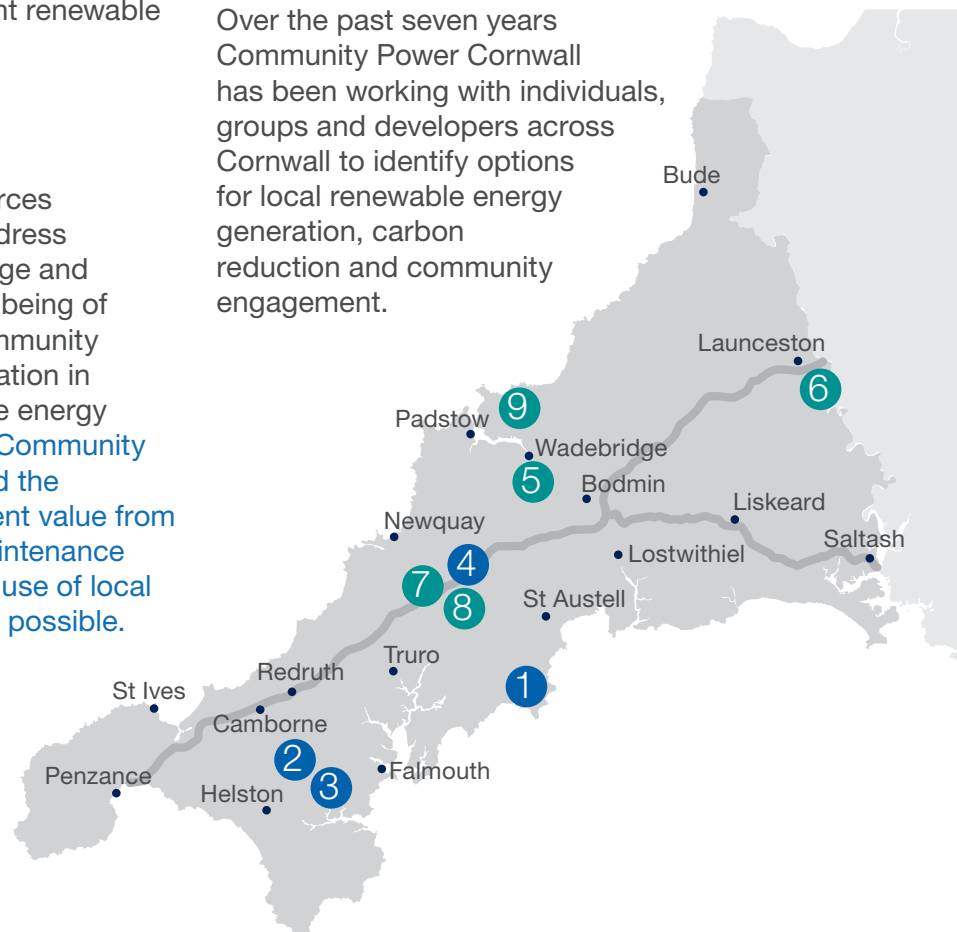

Activities of the society

Community Power Cornwall intends to meet its aims and objectives through the following activities:

- ⚙ Working with communities to identify further suitable renewable energy projects in their local area.
- ⚙ Entering partnerships and joint ventures on behalf of communities and members to develop successful renewable energy and low carbon schemes.
- ⚙ Developing and managing the installation of renewable energy and low carbon schemes.
- ⚙ Managing the sale of renewable energy.
- ⚙ Running a peer development programme, transferring skills to participants and building the capacity of communities to independently develop their own local energy co-operatives.

Current and prospective ventures/ Project portfolio

Over the past seven years Community Power Cornwall has been working with individuals, groups and developers across Cornwall to identify options for local renewable energy generation, carbon reduction and community engagement.

Gorran Highlanes

1

Site and History: Gorran was CPC's first community owned renewable energy installation, developed in close co-ordination with the Transition St.Goran group.

Construction was completed in August 2011.

Status: Operational

Installation: 2 x Endurance E-3120 80KW wind turbines.

Partners: Community Power Cornwall & Transition St.Goran

Outputs: Generation August 2011- April 2013 = 1024306 KWh
Equivalent to annually powering 221 UK homes
Carbon Saving = 492tonnes

Benefits: Current investment return without EIS – 4%
3% of the revenue generated is provided to Transition St.Goran for other Low Carbon activities in the local area. Activities to date include insulation for the village hall and LED lighting in the village church.

BF Adventure, Halvasso

2

Site and History: BF adventure is a registered charity providing activities for young people that focus on developing self-confidence, increased communication and team work skills through pursuits that challenge, motivate and inspire young people to take positive steps forward in their life and personal development.

Status: Operational

Installation: Aircon 10S 10KW wind turbine

Partners: Community Power Cornwall & BF Adventure

Outputs: Installed April 2014
Expected annual generation 30,000KWh
Equivalent to annually powering 6.5 UK homes.
Carbon Saving = 14.4 tonnes/yr

Benefits: BF adventure will receive a fixed electricity price at parity to its export value (currently 4.5p/KWh) for the 20 year lifetime of the project. This will dramatically decrease BF Adventure's current running costs and protect them against future electricity price rises.

BF Adventure

3

Site and History: As part of their wider sustainability aspirations for the site BF are now looking at building their new 'Rocket Kitchen,' with the option of a roof mounted solar PV installation.

Status: Permitted

Installation: 7KW Solar PV array

Partners: Community Power Cornwall and BF Adventure

Outputs: Expected Output 7,596KWh/yr
Equivalent to annually powering 1.6 UK homes
Carbon Saving = 3.6 tonnes/yr

Benefits: BF adventure will receive a fixed electricity price at parity to its export value (currently 4.7p/KWh) for the 20 year lifetime of the project. This will dramatically decrease BF Adventure's current running costs and protect them against future electricity price rises.

Glebe Farm, St.Enoder

4

Site and History: This Dairy Farm in mid Cornwall has strong aspirations to become as sustainable as possible and is also home to Pentreath Limited, a Cornish mental health charity.

Status: In the planning system
Submitted March 2014

Installation: 100KW Northern power systems wind turbine

Partners: Community Power Cornwall, Glebe Farm, Pentreath Limited

Outputs: Expected annual output: 317,200KWh
Equivalent to annually powering 69 UK homes
Carbon Saving = 152tonnes/yr

Benefits: Pentreath Limited will benefit from 3% of the revenue from the scheme as well as a fixed price electricity supply at parity with grid export (currently 4.5p/KWh). This income will be used to support mental health services across Cornwall.

Pengelly Farm, Wadebridge

5

Status: Constructed May 2014

Installation: 500KW EWT wind turbine

Our partners: Pengelly Farm, Clean Earth Energy

Outputs: Expected annual output: 1480MWh
Equivalent to annually powering 320 UK homes
Carbon Saving = 710tonnes/yr

Benefits: Community benefit fund - £10,000/yr
Community services package - £15,000/yr
Expected local share offer return 10%

Shears Barton, Lawhitton

6

Status: In the planning system, submitted April 2014

Installation: 500KW EWT turbine

Our partners: Connick Renewable Energy and the Perry family

Outputs: Expected annual output: 1533MWh
Equivalent to annually powering 331 UK homes
Carbon Saving = 736tonnes/yr

Benefits: Community benefit fund - £10,000/yr
Community services package - £10,000/yr
Expected local share offer return 5-7%

Tredinnick, St.Newlyn East

7

Status: Submitted to planning June 2014

Installation: 500KW EWT turbine

Our partners: Clean Earth Energy & Tredinnick Farm (the Pellow family)

Outputs: Expected annual output: 1380MWh
Equivalent to annually powering 298 UK homes.
Carbon Saving = 662tonnes/yr

Benefits: Community benefit fund - £15,000/yr
Community services package - £5,000/yr
Expected local share offer return 7-8%

Trenithon Farm, Summercourt

8

Status: Consultation May 2014

Installation: Max. 900KW EWT turbine

Our partners: Mi-Grid, Trenithon Farm (the Lutey family)

Outputs: Expected annual output: 2802MWh
Equivalent to annually powering 605 UK homes
Carbon Saving = 1344tonnes/yr

Benefits: Community benefit fund - £5,000/yr
Expected local share return 6-7%

Treswarrow Park Farm, Port Isaac

9

Status: In development

Installation: Current option Enercon E33 330KW turbine

Our partners: Murex Energy

Outputs: Expected annual output: 950MWh
Equivalent to annually powering 205 UK homes.
Carbon Saving = 456tonnes/yr

Benefits: In development

*Annual average electrical consumption of a UK home – 4,629KWh/yr. Cornwall Council renewable energy planning guidance notes.

Carbon Savings 0.480kgCO₂/KWh . EST May 2014

Community Power Cornwall

Other projects are in development to support a broad range of technologies at a variety of scales. Finance generated from our early developments will bring these options closer to fruition.

We are now pleased to open this share offer giving all interested parties the opportunity to invest and take part in a successful green future for Cornwall and its communities.

Shares available

We are seeking to raise capital on both operational and new developments as we would rather pay share interest to members than loan interest on debt finance.

We would therefore like to swap out debt finance related to operating developments for new member equity and would similarly like to finance new developments with new member equity and thereby reduce our borrowing requirements.

Operational developments with debt to swap out:

Gorran £515,000 (standard shares)
BF wind £80,000 (microgeneration shares)
Subtotal operating £595,000

New developments with capital requirements:

BF Solar £11,000 (microgeneration shares)
Glebe wind £129,000 (standard shares)
Subtotal new developments £140,000

Total share offering available £735,000

Microgeneration shares available:

£91,000

Standard shares available:

£644,000

Future projects

Community Power Cornwall aims to form enduring, successful partnerships with residents, local government, local businesses, co-operatives, third sector organisations, approved technology providers and key stakeholders to develop a diverse, secure and sustainable supply of renewable energy for the benefit of the local community and its members.

Community Power Cornwall keenly anticipates the influx of talent, skills and ideas from new members through this share issue and aims to create the structures and finance models required for the creation of independent, commercially viable local energy co-operatives that meet the broad objectives of the society.

A brief history

Community Power Cornwall has evolved through community led demand for the ownership and integration of renewable energy technologies into everyday lives and settings. We hope to trap money in Cornwall and to enable local communities to collectively tackle the threats of climate change, energy security and uncontrollable fuel cost rises by generating clean, renewable energy locally.

Community Power Cornwall is an independent organisation with development supported through a partnership between Community Energy Plus and Social Economy and Co-operative Development Cornwall. Early development funds were also provided by Cornwall Council and the Cornwall Development Company.

Community Energy Plus is an award-winning charity that delivers local solutions to fuel

poverty, energy efficiency and sustainable energy. For more than 15 years they have worked on projects throughout Cornwall to provide advice and support for renewable energy projects to reduce carbon emissions that contribute to climate change.

www.cep.org.uk

Social economy and Co-operative Development Cornwall, trading as 'Kabin'

is the Co-operative Development Body based in Cornwall. It is a not-for-profit company limited by guarantee and a co-operative.

The company is staffed by SFEDI accredited¹ social enterprise advisers and has supported the development of co-operative and social enterprise since 1997.

www.co-opdevelopment.org

Our status as an Industrial and Provident Society

Community Power Cornwall is an Industrial and Provident Society, registered with the Financial Conduct Authority (number 30512 R) under the Industrial and Provident Societies Act (and any successor act). Community Power Cornwall is owned by its Members, whose liability is limited under the Industrial and Provident Societies Act 1965. Its constitution is in the form of Rules registered by the Financial Conduct Authority. The Rules of the Society are available on request.

The status of Community Power Cornwall as an Industrial and Provident Society prevents the transfer of these shares to third parties.

Membership of the Society

Membership is open to individuals and organisations that share the Society's goals, are in agreement with the Society's objectives and wish to share risks and benefits.

Members make decisions at general meetings on a "one member, one vote" basis irrespective of the number of shares held. Members elect the board who oversee the business and are accountable to the members. Only members are eligible to serve on the board.

We hope to enjoy a high level of member participation and engagement. Currently you must be at least 16 years old for full membership.

There is a single class of shares with a nominal value of £1.

Members of the Society must have a minimum of 50 shares and a maximum of 100,000 (Unless the member is another Industrial & Provident Society).

¹ "SFEDI is the Government recognised UK Standards Setting Body for Business Support and Enterprise. Run by entrepreneurs for entrepreneurs, SFEDI researches leading practice, sets standards, principles and guidelines." (from <http://www.sfedi.co.uk/>)

Community Power Cornwall

Community Power Cornwall has a professional management team composed of Neil Farrington, Paul Martin and Clayton Elliott. Members appoint and elect the board ensuring democratic accountability.

The current officers and board members represent a positive compliment of skills, knowledge and experience to ensure the Society meets its objectives and have enabled Community Power Cornwall to establish a good track record.

Neil Farrington Technical Director

Neil is the Sustainable Energy Projects Manager at Community Energy Plus and has worked with the Cornish Charity for over 12 years. He has worked with communities across the county to build awareness about the options for, and assist with, the delivery of renewable energy and energy efficiency projects in community settings. His work has directly contributed to the success of sustainable energy projects in communities across Cornwall with a total installed capacity nearing 1MW, bringing over £3 million of funding into the county. In 2010 Neil won the 'Best individual' at the Cornwall Sustainability Awards and was shortlisted for the National Renewable Energy Association Energy Champion Award 2010.

Paul Martin Executive Director

Paul is the director of Kabin and has a wealth of experience supporting many co-operatives, social enterprises, traditional charities and mainstream businesses. Over the past 16 years Paul has acted as company secretary for a number of organisations and sits on the board of South West Co-operative Support and Co-operatives South West. Paul is a SFEDI accredited business advisor with specific knowledge and experience of community enterprise and community development finance. Paul has helped communities to own, operate and benefit from land, buildings, food enterprises, financial services, low carbon technologies and renewable energy technologies.

Clayton Elliott Finance Officer

Clayton has worked for social and environmental organisations for most of his adult life, including the role of Climate Change Campaigner for Cornwall Friends of the Earth. He has worked for Kabin as a SFEDI accredited Co-operative and Social Enterprise business advisor since 2007. He is the finance officer for Community Power Cornwall, The Low Carbon Society and the Low Carbon Fund. Clayton is also a professional counsellor in private practice and the Chief Executive Officer for the charity Counselling for Social Change.

Richard Bennett Non executive board member

Retired Art Teacher and small business owner, Richard is acting chairman of the St Goran Transition Group and involved in other local organisations including Village Hall committees.

Matt Hocking Non executive board member

A designer for 20 years, Matt has worked for national brands including the National Trust and the Eden Project. He is the founder of Leap Media and co-founder GoJute, though which he helped create the first CarbonZero jute produce factory in India. Matt also founded eco-underwear micro start up Tachepants in 2011.

Robin Curtis Non executive board member

A renewable energy consultant since 1984, Robin's specific area of expertise is renewable heat which has seen him working on a deep geothermal project and the introduction of ground source heat pumps into the UK. Robin is the chair of Transition Constantine, a Director of Falmouth Energy Partnership and a Director of GeoScience Ltd.

Ben Simpson Non executive board member

Ben is a strategic low carbon professional with over a decade experience working across the public, private and third sectors in a range of role for organisations such as Greenpeace UK, Community Energy Plus and the Cornwall Development Company. His roles have included front line delivery, campaigning, project management and research, as well as climate change policy development and strategic consultancy. A Camborne School of Mines graduate Ben also holds Masters degrees in environmental social science and sustainability leadership from University College London and the University of Cambridge Institute for Sustainability Leadership.

Risk factors

Community Power Cornwall makes every effort to minimise risk on all its operations but applicants should be aware that this share capital is risk capital and there is a possibility of loss as well as return.

To date financing of our developments has included a mix of secured debt, unsecured debt and member equity. In terms of the ranking in any queue to be repaid secured debt outranks unsecured debt and unsecured debt outranks member equity.

For a detailed breakdown of identified risks and risk management strategies please refer to our business plan available on request.

Governing law and investor protection

This issue is not a "regulated activity" within the meaning of section 22 and schedule 2 of The Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 SI 2001/544.

Non-transferable shares in a society are outside the definition of a "regulated investment" for the purpose of the FSMA 2000 - articles 73 & 76 of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 SI 2001/544.

These shares are not "transferable" or "negotiable on the capital market" and therefore are outside the prospectus requirements - section 102A(3) of FSMA 2000 as substituted by The Prospectus Regulations 2005 SI 2005/1433 art 2(1) & schedule 1.

Industrial and Provident Societies are exempt from the FMSA 2000 general prohibition in respect of accepting deposits in the form of withdrawable share capital.

Non-transferable shares in a society are outside the definition of a "controlled investment" for the purpose of the financial promotion rules - article 35 and schedule 1 paras 14 & 15 of The Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 SI 2005/1529.

Community Power Cornwall is not a member of any investment protection scheme.

Our Mission

Community Power Cornwall Limited is an Industrial and Provident Society, owned by its members and created to be environmentally, socially and financially useful.

Community Power Cornwall Limited develops, owns and operates small to medium scale community-owned renewable energy installations and develops joint ventures.

This co-operative was established in 2008 to enable community ownership of energy assets, to generate capital to be re-invested locally in renewable energy and to nurture the spread of community-owned renewable energy generation.

We care for and wish to benefit the wider community by responsibly meeting our environmental, social and financial goals.

We are united to meet our common needs and aspirations around energy, the environment, economic sustainability and social justice.

Where did you hear about us and this offer?

Applicants should be aware that this share capital is risk capital and there is a possibility of partial or complete loss. CPC hopes to pay a modest interest on share capital however if the Society does not generate sufficient profits it may not make an interest payment. Data Protection: By applying for membership you consent to the Society, its contractors and agents holding personal data about you in accordance with the Data Protection Act 1998. We will not sell or exchange mailing lists.

Your Application: You cannot withdraw your application for shares after we receive your application form. The Directors do not have to accept your application for shares. They may decide not to issue shares to you or may allocate you less shares than you applied for. They do not have to give any reasons for their decision. Your application may not be considered for approval until after the closing date of the offer, and therefore you should not expect an immediate response.

Your Payment: Community Power Cornwall may cash your cheque as soon as it is received. Community Power Cornwall will hold your money on trust for you in a separate account until the Directors consider your application. The Directors will return your money to you if they decide not to issue shares to you. If they decide to issue fewer shares to you than you applied for, they will return the balance to you. The money will belong to Community Power Cornwall (and the Directors will no longer hold it on trust for you) as soon as the Directors issue shares to you (to the extent that they take it as payment for shares). The Society will not pay you interest on any money it returns to you or on money held on trust prior to the issue of shares to you.

Your promise to the Society

You promise that:

- Any cheques from you will be honoured on presentation.
- You as an individual are at least 16 years of age.
- You have the authority to sign the application form. If you are signing it for another person, you will provide the Directors with evidence of your authority to sign if they ask to see it.
- You will supply us with proof of your identity and address if the Directors ask for it. They may need to do this to comply with the Money Laundering Regulations 2003. The Directors may have to hold your shares until they see this.

Miscellaneous: This brochure and any agreement entered into for the purchase and sale of shares in the Society are governed by the law of England and Wales. The courts of England and Wales have non-exclusive jurisdiction. You will be bound by the rules of Community Power Cornwall (as may be amended from time to time) if the Directors issue shares to you.

The Registered office for Community Power Cornwall:

3 Trenhaile Terrace, Malpas, Truro, Cornwall, TR1 1SL

Banker: *The Co-operative Bank* p.l.c., P.O. Box 101, 1 Balloon Street, Manchester, M60 4EP

Nomination Option: In the event of the death of a shareholder, the repaid value of the shares will normally be added to the estate for probate purposes. You may (if you wish) elect to nominate a recipient for the value of the shares (but only up to £5000) and thus (under current legislation) remove the shares (up to £5000) from your estate for probate purposes (i.e. the shares may pass to the nominee outside the Will of the deceased). Remaining shares over £5000 will go through the will of the deceased. The nominated property will nevertheless form part of the deceased's estate for Inheritance Tax purposes, unless the estate is an excepted estate.

Anti-Money Laundering

Regulations: Community Power Cornwall is currently exempt from having to comply with the Anti Money Laundering Regulations because the society is registered under the Industrial and Provident Societies Act (1965). However, the Directors of Community Power Cornwall have decided to follow best practice and apply the regulations. This means that we will verify the identity of anyone wishing to invest in Community Power Cornwall. If you are making a single investment of up to £10,000 then a cheque drawn on an account in your name held with a British bank will be sufficient evidence of your identity. If you are making a larger investment (of over £10,000), or several smaller investments, then we will ask to see one document to confirm your identity and one document to confirm your home address.

Documents that you may use to confirm your identity:

- Current signed passport
- Current UK driving licence
- EU member state ID card
- Original letter from HM Revenue and Customs (not a P45 or P60), the Benefits Agency
- or DWP containing your full name and national insurance number.

Documents that you may use to confirm your address:

- Bills - recent utility or council tax bills
- Statements - recent bank, building society, mortgage or credit union statements
- Council rent book or a tenancy agreement.

If you have any difficulty supplying any of these documents then please contact Community Power Cornwall in order to discuss how we may confirm your identity and address to our satisfaction.

An ethical investment meeting environmental, social and financial needs.
